

# NanoVi™

for health professionals

The NanoVi™ device is a safe and effective way to promote health and vitality for people of all ages. Whether sessions are done independently or in conjunction with other treatments, the improvement in client outcomes is noticeable and measurable. The device is easy to operate, requires little to no staff oversight, and has no contraindications.

## Health and Prevention Benefits

NanoVi™ technology is designed to improve the body's general state of health by repairing oxidative stress damage. Damage is unavoidable because no antioxidant regime can eliminate all free radicals. Since cellular damage cannot be prevented, the best approach is to repair it as effectively as possible.

Benefits of more effective repair include:

- enhanced ability to address chronic diseases
- improved immune system
- greater balance in the autonomic nervous system
- better utilization of oxygen and nutrients
- improved cellular activity, including energy production and detoxification
- faster recovery from exertion and physical challenges

## The Technology

At the cellular level, the human body naturally produces biological signals to initiate and contribute to all kinds of cellular function. One of these signals initiates an essential part of oxidative response, which is the repair of oxidative stress damage. Since the precise signal to trigger cellular repair is known, a bio-identical signal can be created to augment its function.

NanoVi™ devices produce a bio-identical signal proven to initiate cellular repair and regeneration. Eng3's patented technology mimics the natural biological signaling process and is completely drug and substance-free. The ultimate result is a boost in cellular activity and regeneration.

Measures of improvement in markers for oxidative stress damage, immune response, levels of DNA damage, and numerous other tests verify the effectiveness of NanoVi™ technology. Independent research, including placebo-controlled studies, confirms its benefits.

## Implementing the NanoVi™

The NanoVi™ was designed for easy operation by clients or staff. The user inhales humidified air that carries the bio-identical signal through either a nasal cannula or the touch-free flexible arm. Individuals may be sitting up or lying down during a session.

Initiating a session is as simple as pressing the start button. The preferred session time can be stored in memory or entered prior to use. When the session is complete, the device will automatically stop.

The NanoVi™ has a smart card system so clients can administer their own sessions using prepaid SmartCards. Staff can become proficient in using and representing the NanoVi™ device with a single training session. Eng3 provides staff training, brochures and other materials, as well as ongoing support to ensure business success.

## Business Success

The NanoVi™ device:

- offers health benefits for clients of all types
- is cost effective and profitable, often paying for itself in a matter of months
- requires little maintenance, service, or staff training
- uses minimal space in a waiting room or treatment area, or can be cart-based
- is an exciting new service to offer existing clients or attract new ones
- comes with all the materials and online content needed for marketing to clients

## What Health Professionals Say

“I have had great results with the NanoVi and recommend it be used both to help prepare patients for treatment and to accelerate their recovery. Because it helps improve the overall metabolic state, it leads to better outcomes, regardless of the nature of an intervention. I recommend NanoVi to any doctor practicing regenerative medicine”  
- L. Martinez, M.D.

“Because it helps initiate repair, we include NanoVi sessions in at least a dozen of our protocols. Our center has administered thousands of NanoVi sessions with great results” - C. Issels, N.D.

“I use the Eng3 device all day to help my clients heal from disastrous injuries; it helps make them more responsive to bodywork. The outcome is better because their tissue is more relaxed and receptive to change” - B. Dobbs, LMT.

“I am definitely an advocate of Eng3’s technology, which has been part of my clinic for years. By supporting the patients’ immune system and underlying health, NanoVi™ technology helps them address almost any health challenge.” - V. Hunt, D.C.
