

# NanoVi™

for health professionals

The NanoVi™ device is a safe and effective way to promote health and wellness while simultaneously creating a new revenue stream. The device is easy to operate and does not require staff oversight. Whether sessions are done separately or concurrently with other treatments, practitioners notice better client outcomes.

## Health and Prevention Benefits

NanoVi™ technology is designed to improve the body's response to oxidative stress damage. Helping counterbalance oxidative stress leads to better health and vitality for clients of all types.

Benefits of better oxidative response include improved:

- protection against and repair of free radical damage
- ability to address chronic diseases
- immunity and balance of the autonomic nervous system
- utilization of oxygen and nutrients
- cellular activities including energy production and detoxification

## The Technology

At the cellular level, the human body naturally produces biological signals to initiate or contribute to all kinds of cellular function. One of these signals triggers oxidative response, the regeneration and repair that counterbalances oxidative stress damage. Because the precise signal for oxidative response is known, a bio-identical signal can be created to augment this specific signaling capability.

NanoVi™ devices produce the precise bio-identical signal known to initiate oxidative response. Therefore, this patented technology assists the natural biological signal to regenerate and repair oxidative stress damage and ultimately boost cellular activity. Markers for oxidative stress damage, immune response and the repair of DNA damage have been used to show the effectiveness of NanoVi™ technology.

## Implementing the NanoVi™

The NanoVi™ was designed for intuitive and easy operation for both the staff and client. The client inhales moist air from either a cannula or the touch-free flexible arm delivery system and may be sitting up or lying down during their session.

Initiating a session is as simple as pressing the start button and the preferred session time can be stored in memory. When the session is complete the device will automatically stop.

The NanoVi™ has a smart card system so clients can administer their own sessions using prepaid SmartCards. Eng3 offers complete support and training for the NanoVi™. The device is easy to use and staff can become completely proficient in its use and able to explain it to clients within an hour or two.

## Business Success

The NanoVi™ device:

- offers great health benefits for clients of all types
- is cost effective and profitable, often paying for itself in a matter of months
- requires little maintenance, service, or staff training
- uses little space and can be easily added to existing treatment areas
- is an exciting new service to offer existing clients or attract new ones
- comes with all the materials and online content needed for marketing to clients

## What Health Professionals Say

“This is a device I recommend for a wide range of people. My patients and I have benefited greatly from it.”  
- K. Epstein M.D.

“I’m using it with all my patients and am very happy with it. I always recommend it for patients suffering from fatigue, they will see quick results.” - M. Corsellis, N.D.

“I use the Eng3 device all day to help my clients heal from disastrous injuries, it helps make them more responsive to bodywork. The outcome is better because their tissue is more relaxed and receptive to change” - B. Dobbs, LMT.

“All my clients use Eng3’s device. We’re tracking the results and it’s having a measurable, positive effect.”  
- M. Hall Ph.D.

“This device is helpful to everyone. So many of my clients have benefited from it that I’m sure it can improve the patient outcomes of almost any health practice.” - M. Hunt, D.C.
