

NanoVi[®]

for health professionals

The NanoVi device is a safe and effective way to promote health and vitality for people of all ages. Whether sessions are done independently or in conjunction with other treatments, the improvement in client outcomes is noticeable and measurable. The device is easy to operate, requires little to no staff oversight, and has no contraindications.

Health and Prevention Benefits

NanoVi technology is designed to improve the body's general state of health by improving protein function. Oxidative stress is the primary cause of protein damage and NanoVi helps repair this damage and initiate regeneration. Even the most conscientious health regime cannot eliminate all oxidative stress damage, so the best approach is to repair it as effectively as possible.

Benefits of more effective cellular repair include:

- enhanced ability to address chronic diseases
- improved immune function
- greater balance in the autonomic nervous system
- better utilization of oxygen and nutrients
- improved cellular activity, including energy production and detoxification

How NanoVi[®] Helps

NanoVi is a unique and innovative way to promote cellular health. The body continuously produces biological signals to orchestrate all kinds of cellular functions. Scientific research has proven that one of these signals influences the cellular water in a way that supports protein folding and function. The NanoVi device produces this precise signal, which is absorbed by water droplets in a humidified airstream. This causes the water molecules to become more densely packed or "ordered". Inhaling the NanoVi-enhanced humidity increases order in the cellular water and supports protein activity. NanoVi augments the body's ability to address damage and improve cellular function, without the use of chemicals or substances of any kind.

Measured reductions in oxidative stress damage and DNA damage, and improvements in inflammation, immune response, mitochondrial function, and numerous other measures, verify the effectiveness of NanoVi technology. Independent research, including double blind placebo-controlled studies, confirms its benefits.

Implementing the NanoVi®

The NanoVi was designed for easy operation by clients or staff. The user inhales humidified air from the device through either a nasal cannula or the touch-free flexible arm. Individuals may sit, stand, or lie down during a session, and other modalities or stationary activities can be offered at the same time.

Initiating a session is as simple as pressing the start button. The preferred session time can be stored in memory or entered prior to use. When the session is complete, the device will automatically stop.

The NanoVi has a smart card system so clients can administer their own sessions using prepaid chip cards. These cards help centers earn a rapid return on investment. Staff can become proficient in using and representing the NanoVi device with a single training session. Eng3 provides staff training, brochures and other materials, as well as ongoing support to ensure business success.

Business Success

The NanoVi device:

- offers health benefits for clients of all types
- is cost effective and profitable, often paying for itself in a matter of months
- requires little maintenance, service, or staff training
- uses minimal space in a waiting room or treatment area, or can be moved on a cart
- is an exciting new service to offer existing clients or attract new ones

What Health Professionals Say

"I have had great results with the NanoVi and recommend it be used both to help prepare patients for treatment and to accelerate their recovery. Because it helps improve the overall metabolic state, it leads to better outcomes, regardless of the nature of an intervention. I recommend NanoVi to any doctor practicing regenerative medicine" - L. Martinez, M.D.

"Now we can reach inside the cell. Now we can fix the ultimate barrier to healing, our broken and damaged DNA and our cellular proteins. NanoVi unlocks the physics of healing. In our clinic, we are using functional capacity assessments that show not only that people feel better but also do better" - Dr. P. Strait D.O.

"I recommend it for clinics that care about improving the recovery of their patients such as holistic medicine clinics, complementary medicine, integrative medicine and preventive medicine clinics as well as any other clinics that care about improving their patients' health outcomes" - Dr. N. Abdel Ghany, M.D.

"I am definitely an advocate of Eng3's technology, which has been part of my clinic for years. By supporting the patients' immune system and underlying health, NanoVi™ technology helps them address almost any health challenge." - V. Hunt, D.C.
