

NanoVi® Spotlight: Professional Use

Dr. Martinez, regenerative and cell therapy specialist

"I've done about 300 stem cell procedures with the NanoVi and many more without it, and I've noticed a profound difference between the two groups, especially in the time it takes to observe a therapeutic response. NanoVi-treated patients see faster, more consistent results. And even without stem cell treatment, my patients report significant benefits using the NanoVi - increased focus, energy, general wellbeing, and so on."

- **Luis Martinez MD, MPH, Xano Gene Clinic, Anti-Aging, Health & Wellness Center**

BIOLI Spa goer relaxing while repairing oxidative damage

"NanoVi is an effective way to help people regenerate, repair and recover. It fits perfectly with our vision of an advanced health centre, focused on measuring and improving cellular health... After several sessions with the NanoVi, guests' oxidative stress and overall well-being is improved. They say things like 'after the session I feel more energized and refreshed' or 'it makes me calm and relaxed'."

- **Nino Nakashidze, MD, BIOLI Medical Wellness Resort**

Caspar enjoying one of the NanoVi Exo's at NYCIM

"One of my favorite places to work is the IV chair at our center, the New York Center for Innovative Medicine. That's where I'm normally using this device to optimize my mitochondrial function and balance my autonomic nervous system. We usually have our patients, regardless of any therapy they're doing IV, whether it's another oxidative therapy, they're hooked up. You know, we have four or five of these always going and everyone's getting their NanoVi treatments."

- **Caspar Szulc, Co-Founder, New York Center for Innovative Medicine (NYCIM)**

Client enjoying the NanoVi

"We found out about NanoVi at the Bulletproof conference. We love stacking sessions with NeuOptimal neurofeedback since both sessions are 30 minutes and relaxing. Clients love the super stack of NanoVi, while doing NeuOptimal and lymphatic massage... It can be combined with neurofeedback, red-light therapy and other add-ons. Great for expedited recovery for athletes, immune health, mental and physical vitality and for anyone who wants give their body extra support for healing and wellbeing!"

- **Angela Martinucci, Owner, Bay Area Brain Spa**

Heather enjoying the NanoVi Exo

"Our professional athletic clients are completely hooked... From MMA champions, NFL players, top 10 pro motocross riders, mountain bike phenoms, tri-athletes, etc... they basically refuse to go without their infusion of NanoVi ordered water vapor. Since integrating the NanoVi device into our technology offerings, we've witnessed significantly higher levels of 'Ascent Program' efficacy. As CEO of Ascent, I am committed to treating myself to a daily 15-minute session or two... I actually have a device at my desk"

- **Heather Hiniker, CEO, Ascent - Adaptation and Regeneration**

Dr. Haas, anti-aging medicine specialist

“The NanoVi has been a great addition to our anti-aging medicine practice in Encinitas, CA. It adds value and enhances the benefits of the services we offer, which include high-dose ozone autohemotherapy (HOT), IV stem cell infusions, and musculoskeletal and soft tissue injections. Of note, I credit using the NanoVi in part to my rapid and remarkable recovery after a major dental cavitation surgery (at 2 weeks follow-up the dentist could hardly believe I had even had surgery). My patients often report that using the NanoVi after HOT quickly relieves detox symptoms, and it increases their overall sense of well-being.”

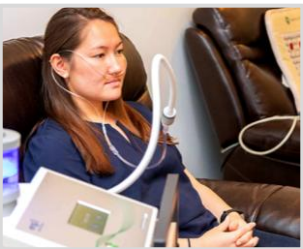

- **Dr. Korianne Haas MD, Flourish Anti-Aging Medicine, Corp.**

Clients like UFC Fighter Miranda Granger rely on NanoVi

“The NanoVi is an essential tool for any combat sport athlete looking to optimize their performance, output, and recovery. When coupled with additional recovery methodologies the effect is compounded and rather miraculous!”

- **Arash Rajnbaran, Trainer, Athletic Training Institute (ATI) Bellevue**

Client using NanoVi at Golden Biohack

“Our clients report stress relief and relaxation of muscles in the short term and improved circulation and tissue perfusion, faster recovery from exercise, improved sleep... Nanovi works great with other technologies. Many clients report improved sleep. Another client frequently reports enhanced sense of well-being and relaxation while on the NanoVi.”

- **Ryan Brassell, Co-Owner, Golden Biohack**

Clients regenerate in Holistique's lounge

“We introduced NanoVi to our clinic more than 5 years ago. We loved it so much that within 2 years we added another system to our IV lounge. NanoVi has transformed our patients' capacity to recover from oxidative treatments such as ozone therapy, IV vitamin C, hyperbaric oxygen therapy and exercise therapy. Thank you Eng3 for your innovative evidence-based technology.”

- **Dr. Nooshin Darvish, Holistique Naturopathic Medical Center**

Chris Dodson beside one of his HBOT units

“We have added NanoVi to all our clients' programs. Very quickly, we noticed that all of our Cancer patients were feeling more productive and had lots more energy after a Hyperbaric treatment followed by a NanoVi session. Results can be dramatic or more subtle, depending on the client's condition. For example, the parents of a 5-year-old autistic boy reported seeing better behavior at school and home, when we added NanoVi, but these changes don't show up while he is at the center. We also noticed that clients who didn't see strong results with hyperbaric treatments alone see big changes once they start NanoVi, when they get a burst of energy, just amazing.”

- **C. Dodson, owner, Hyperbaric Therapy of Dublin and other HBOT centres**
